

InfosysVirtual Internship

STUDENT'S WEEKLY DIARY

Week-1			DATE	14 Feb 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer	
Name of the Supervisor with E-mail id	Abhishek Arya springboardmentor991@gmail.com			
Main points of the Week				
• Understood the project objectives and scope. • Studied football analytics and sports prediction concepts. • Identified system requirements for EPL points tally prediction. • Analyzed requirements for top goal scorer prediction. • Researched machine learning techniques used in sports analytics. • Selected Python, Streamlit, HTML, CSS, and JavaScript as development technologies. • Planned project workflow and development phases. • Prepared initial project architecture and implementation strategy.				
Week-2			DATE	22 Feb 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer	
Name of the Supervisor with E-mail id	Abhishek Arya springboardmentor991@gmail.com			
Main points of the Week				
• Collected historical EPL datasets from reliable sources. • Gathered player and team performance statistics. • Analyzed dataset structure and available features. • Studied goals, assists, matches played, and points data. • Identified important attributes for prediction. • Performed exploratory data analysis . • Visualized football statistics using charts and graphs. • Prepared datasets for preprocessing.				
Week-3			DATE	2 Mar 2026

Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer	
Name of the Supervisor with E-mail id	Abhishek Arya springboardmentor991@gmail.com			
Main points of the Week				
• Cleaned datasets by removing missing values. • Removed duplicate and irrelevant records. • Standardized and formatted dataset attributes. • Performed feature selection for prediction models. • Created new features from existing football statistics. • Normalized and organized the data. • Split datasets into training and testing sets. • Prepared final datasets for machine learning implementation.				
Week-4			DATE	9 Mar 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer	
Name of the Supervisor with E-mail id	Abhishek Arya springboardmentor991@gmail.com			
Main points of the Week				
• Implemented machine learning algorithms using Scikit-learn. • Developed EPL points tally prediction model. • Developed top goal scorer prediction model. • Trained models using historical football data. • Applied Random Forest Regression techniques. • Evaluated model performance using accuracy metrics. • Fine-tuned model parameters for better results. • Saved trained models for deployment.				

Week-5			DATE	16 Mar 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer	

Name of the Supervisor with E-mail id	Abhishek Arya springboardmentor991@gmail.com		
Main points of the Week			
- Designed the homepage of the ScoreSight system. - Created responsive web page layouts using HTML and CSS. - Added interactive functionality using JavaScript. - Developed navigation menus and user interface components. - Designed prediction input forms. - Improved website responsiveness and accessibility. - Enhanced visual appearance of the application. - Tested frontend functionality and user experience.			
Week-6			- DATE 23 Mar 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer
Name of the Supervisor with E-mail id	- Abhishek Arya - springboardmentor991@gmail.com		
Main points of the Week			
- Developed the application interface using Streamlit. - Connected trained machine learning models with Streamlit. - Implemented EPL points prediction functionality. - Implemented top goal scorer prediction functionality. - Displayed prediction results dynamically. - Integrated charts and data visualizations. - Improved application performance and usability. - Conducted functionality testing of the Streamlit app.			
Week-7			- DATE 30 Mar 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer
Name of the Supervisor with E-mail id	Abhishek Arya springboardmentor991@gmail.com		
Main points of the Week			

- Tested all modules of the ScoreSight system.
- Verified prediction outputs using sample datasets.
- Compared predicted results with historical records.
- Evaluated model accuracy and reliability.
- Identified and resolved system errors.
- Improved prediction performance through optimization.
- Generated result reports and visual analyses.
- Documented testing outcomes and observations.

Week-8			DATE	06 Apr 2026
Dept./Division	ARTIFICIAL INTELLIGENCE	Name of finished Product	ScoreSight - Predicting EPL Points Tally, Top Scorer	
Name of the Supervisor with E-mail id	Vishnu Vardhan Nagavarapu springboardmentor299@gmail.com			
Main points of the Week				
• Prepared final project documentation. • Created system architecture diagrams. • Created methodology and workflow diagrams. • Added screenshots of the developed application. • Compiled project implementation details. • Prepared project presentation and poster. • Documented results, findings, and conclusions. • Reviewed project objectives and achievements. • Submitted final internship report. • Successfully completed the ScoreSight project.				

Signature of Industry Supervisor
